QUOTATIONS

DO BE A GOOD CHILD

By adding good things in your life and cancelling the bad one, make you manage different situations and same like that you add manner to your life and routine. Your focus is improved and so your performance and functioning to improves.

By: Hamza Mukhter

Do be a good child. How a child can really transform his life? You can simply do that by holding your personality towards the good side. Elders, at once differentiate between a good kid and an annoying and stubborn kid. So, what are those characteristics that make a simple child a good one?

This transformation could easily be made in you by shifting some of your bad habits and psyche into a nicer and cooler way. Over here, some kids think that it is "cool" to be naughty or wicked and so they repeat many mistakes, leading them to face some light and some worse punishment.

Child often at some age wants to start a good and moral personality but they are unfortunately misled by many people around them. Therefore, many qualities are in hand, which young ones can adopt to be in the good books of parents.

To get pleasant attitude, kids could be as nicer as they can, help others no matter they are of which age, be careful to the things and actions you do, be caring, be really very thoughtful before practically performing anything, keep yourself tidy, show manners in every part of your work, be very obedient to everyone, do study on time, complete your actions, be jolly with your fellows and family, be innocent at mind and pure at heart.

All you have to do is, make a list of all these good actions and personally perform them on you daily basis and yourself feel the difference in few days. Apart from all these good things, there are some bad acts from which you should save yourself. These things might be minor but can destroy your good personality in minutes. Memorize these evil points and promise yourself that you won't ever follow them.

Avoid arguing with your parent, learn from your previous mistakes, never lie, never do ill talk or abuse, never yell or scream in loud voice, stop yourself from unwanted desires and don't cry on small issues.

Promise yourself not to do such things. And see how relaxing it will be for your life. And your parents are going to be proud of you for this change, and once you completely notice that you are able to change some prominent things in you, to the first, appreciate yourself and build more courage in you. Adopt positive and vibrant vibes from your surroundings and always make situations that people get same kinds of vibes from you.

The best way to test is; people always love your

presence around. In addition, to all that there are some remarking advantages of being good in someone's eye. Being good, greatly grooms your personality and, so they will, with the curse of time learn to differentiate between good and bad leading you to get mature at an early age.

By adding good things in your life and cancelling the bad one, make you manage different situations and same like that you add manner to your life and routine. Your focus is improved and so your performance and functioning to improves. You learn to neglect the dark sides of life and people and observe the happy happenings and all of sudden life seems to be as a happy episode. The members you are living, like your parents or even your siblings, appreciates your and become happy of what you do.

Do well and have well. Always over-come your fear and try to be perfect because you actually worth to be that person and surprise everyone with your magic.

INTERESTING FACTS

McDonalds calls frequent buyers of their food “heavy users.”

The average person spends 6 months of their lifetime waiting on a red light to turn green.

You burn more calories sleeping than you do watching television.

There are more life forms living on your skin than there are people on the planet.

In 1386 a pig in France was executed by public hanging for the murder of a child.

If you believe that you’re truly one in a million, there are still approximately 7,184 more people out there just like you.

The average person walks the equivalent of three times around the world in a lifetime.

Guinness Book of Records holds the record for being the book most often stolen from Public Libraries.

Chewing gum while you cut an onion will help keep you from crying.

A hippo’s wide open mouth is big enough to fit a 4-foot-tall child in.

Earth has traveled more than 5,000 miles in the past 5 minutes.

Coca-Cola would be green if coloring wasn’t added to it.

Don't Bother with Either of them

You might have seen individuals encircling you with some peculiar and strong attitude or some eccentric behavior. These abnormalities could be related to their health. Similar to that people may remember a strong young man of age twenty-seven, who only bother things that grant, benefit to his health.

He believes that he could actually increase his fatal age and for that he keep himself engaged with several doing which he believes to be more upright. This half-baked young man thinks that taking shower with extreme cold water in morning could close all cracks of his skin and make him look more and more young day by day. Before getting dressed, he use to rope a towel around and breath the fresh air from window to make his lungs function properly, which he keeps on repeating every morning.

He would have a job of a full time machine anywhere, working like a engine is what all he does, which makes it a strange over-working device while making him strange to most of other people. In his spare time at office, he would lie down on his stomach and lift himself up. If he succeeded to do so than he would find such acts that he fails to do. And so he spends his lunch time happily and He liked it! Every night before going to his cozy bed, he used to sling around in his room, he thinks this makes his mind clean and then sleeps. He clears it after waking up too. In every evening, he lifts iron balls, heavy dumb-bells and hauls up to the ceiling with his teeth.

That silly person is dead. He was, of course, a pioneer, but the fact that he dumb-belled himself to death at an early age. So don't bother with either of them. these kinds of people are ridden by Health Mania. They get up at impossible hours. They ran in little suits

to get Marathon heat before their breakfast. They don't drink water out of tape. They eat too much of meat because it have protein and nitrogen and don't eat fruits because it doesn't have any. They don't drink milk out of a glass. They walk barefoot to get dew to their feet. They haunt for ozone late night and in early morning. They avoid too much of work. They avoid eating things out of a can. They avoid alcohol in any shape. Yes Sir, they are of course Afraid "Cowards".

Such people get an old-fashioned illness and finally die like any other people. Doing such things could not really be great for your age. Listen! Do you want to live to be really old, to enjoy a grand, green and boastful old age?

Then cut out all this nonsense. Cut it out. Get up in the morning at sensible hours. It isn't exhilarating and you know it. Leave your chance on ozone. There isn't anything anyway. Also drop all that cold-bath nonsense. If you have to, take it warm. The pleasure of getting out of a cold bed and creeping into a hot bath can beats a cold plunge to death.

Next, take the question of germs and bacilli. Don't be scared of them. That's all. If you see a germ, walk right up to it and look into his eyes. It will soon get sick of it. Now take the question of food. Eat what you want. Eat a lot of it. Eat everything that you like until you can't pay for it and that should all be in a balanced diet chat. Don't bother with nitrogen and starch. And if you are damn fool than go and get a long good drink of glue or a bag of starch from laundry shop to fulfill your need.

And just one word about fresh air and exercise. Even don't bother with this. Get your room full of good air and shut the windows to keep that fresh air for years. Give people some time to play baseball with you or to run with you. Sleep healthy hours, eat balanced and work-out daily and that's all.

BOOKS UNDER NO LIGHT

Contemporary students are facing colossal difficulty in studying during the hours of load-shedding

By: Abdul Saboor

Students of current times are under a great deal of stress. Sometimes it is the heavy bags which they carry on their backs, usually including not just books but the expensive books or sometimes is the pressure on them from teachers and parent to get good grades, no matter what the situation is. Students and especially the school and college goings of Pakistan have to face most evil situation, which is breakdown of power supply “load-shedding” during the times of study.

Contemporary students are facing colossal difficulty in studying during the hours of load-shedding, when they go to their schools and colleges with the aim to study by hard, have to be disappointed once the electricity breaks down in middle of the lectures. Load-shedding during ongoing classes is proving to be a hectic situation for students, as due to power breakdown they are not able to concentrate on their lectures, class work, home work and what not. For a student it is a gigantic problem which is directly or indirectly affecting their grades, position in class and overall course of study.

No electricity during lectures means student will have to face the hard bashes of summer leaving their studies aside and making them worried about the time at which electricity would be coming back. It is a challenging state for students, which is not only injecting hassle into them but also is a reason for mental problems in children now days. A doctor can easily tell how lethal stress followed by other mental problems can be at this young age. Hence it is not only about the bad performance of students but has now opened a new gate of worry for parents concerning the mental health of their children.

These health related problems such as the mental disorders as the result of poor performance in school and colleges is a big reason to worry, as due to these problems a student is distracted from study to other things and in many cases it is reported that the students who were performing good previously after a slight initiation of stress for which the main reason was load-shedding were seems to have a decline in their academic performance. It is not just the end of story, but when youngsters are distracted from studies they just couldn't get back to the same routine. Once they distract from studies, there comes a high risk of students taking studies on a lighter note and

Government should deal this issue of power shortage with priority and should immediately introduce reforms in power sector to reach the bench mark of “zero load-shedding” in education sector just like government did with industrial sector.

giving more time to fun.

On the other hand students who study till late nights in order to get good grades are also on the red line as when they are busy in studies while giving up the time to relax or sleep are demoralized when electricity breaks down and they are hanged in the middle of nowhere, they keep on waiting for electricity to come back for quite a time. Therefore, neither they are able to finish their work nor they are able to sleep properly as they already had wasted a lot of time in waiting for electricity to come back. Subsequently, they are not able to do their work for the next day and had to resist the taunts of teachers and being not able to sleep makes them even weak and dizzy the next day due to which they are not able to give attention even the next day.

On the other hands teachers are also among the major division which is affected by load-shedding, as teachers had to prepare lectures a day before their class for the better understanding of students, are dreadfully upset with the problem of electricity shortfall. This means if they are not able to prepare their lecture properly, their students would be at loss along with them making it a bilateral chaotic problem for not only the students but to teachers as well.

Ultimately, parents who are paying huge amount of fee for education of their children expect their child to work hard and achieve good grades; at times have to be disappointed from the level of performance of their child. This is a downhearted moment for the parents who just want to see their children at a higher spot in life, but what they are getting is huge fee bills and not so good grades, leaving them no choice but to put the blame on no one else but their children, making them embarrassed from teachers and parents both which increase even more pressure on children and sometimes they even collapse due to this extreme level of pressure and anxiety from the each side.

When new government came after the election in

2013 students believed now the power shortfall will be reduced or may also be eliminated if the government would be serious on this issue, but this belief is still dominated by the word "if". This government made huge loads of promises to eliminate the power shortage which was enormous in previous government's show time but unfortunately this government had also not been able to deliver onto its promises. Let's just address the elephant in the room, no doubt that the hours of load-shedding had been reduced as compared to the time of previous government, it is a good sign and we all should appreciate it but at the same point of time it is also fair to say that still the load-shedding hours are enough to ruin the careers of the students.

Ultimately, parents who are paying huge amount of fee for education of their children expect their child to work hard and achieve good grades; at times have to be disappointed from the level of performance of their child.

Inauspiciously, our young ones who are the asset of Pakistan and will be representing the country in numerous fields in near future are under immense danger in terms of academics due to electricity breakdown. Government should deal this issue of power shortage with priority and should immediately introduce reforms in power sector to reach the bench mark of "zero load-shedding" in education sector just like government did with industrial sector. It is the responsibility of government

to look up to this matter and come up with a solution as high-quality students makes up a superior nation, which can only be possible if electricity is provided 24/7 to educational institutes and as well as to the domestic level. On the other hand, parents and teachers need not to pressurize children for doing a great quantity of work but should prefer quality over quantity. In this way till government come up with a solution parents and teachers should demand quality over quantity from students, therefore if electricity breaks down at any point students do not have much do to otherwise this curse of electricity breakdown will keep on haunting parents, teachers and students in a triangle in the same manner like it did in past.

Sacrifice for Eid

By: Amina Munir

Eid al-Adha, one of the important religious festivals celebrated by Muslims across the globe, this Eid is celebrated on tenth of Zulhijj, the last Islamic month on Muslims calendar. Eid al-Adha is known as the "festival of sacrifice". Muslims, all over the world celebrate it to mark the occasion, when Allah showed to Prophet Ibrahim in a dream and commanded him to sacrifice his son, Ishmael, to demonstrate his devotion and affection to Allah Almighty and at the time of scarification Allah placed a sheep at the position of his son.

Today, story is commemorated on Eid by sacrificing sheep, goat, cow or camel. Every year, people with warm hearts complete this Sunah. On this eve, people who can afford to do 'Hajj', they perform their pilgrimage till ninth of Zulhijj and Muslims in whole world slaughter animals on the very next day. Slaughtering of animals or performing hajj is the sneak peeks of this month. But on the other hand if someone is not able to afford animal for sacrifice, has a free hand.

Eid in Pakistan is somehow different from Eid in other foreign countries. In a Muslim country like Pakistan, people wake up and take bath for the Eid prayer, which is offered by every Muslim after which people slaughter their animals, mostly at their houses. After which the division of the meat is completed, distributing it to the relatives, friends and poor ones.

In other countries such the Britain or America, people offer their prayer and afterward their animals are slaughtered in the slaughterhouse. Slaughter-house take some share of meat for the poor ones and give rest to individuals who paid for slaughtering.

People of Pakistan celebrate this Eid with vigor and intensity. We see big domestic animal markets starting way before Eid, people according to their pockets buy these animals. There are different sections in these animal markets, like he VIP animal section and the normal animal section. VIP animal section is for rich ones, who can afford high prices of well grown animals due to their deep pockets, while the normal animal section is for people who belongs to the middle

class, and cannot spend much on animals.

Every year people have to face high prices of animals which is without any legal appointment. People of middle class see these increasing prices with close eyes, as they have no means to pay for this kind of rates. This crisis shows its head every year with same animals but different and high rates but when we look up to the side of animal raisers; they also have a legitimate reason to increase prices of their animals. They put their axes on government for not giving them any kind of relaxation in taxes for animal transportation, animal feed, and rent for the area of animal market.

But at the same time they should not be marking the prices for their animals on their own, they call high rates according to their own will and this is unlawful, whereas government should give some relaxation for their expenses, and should make departments which would serve the purpose of regulation and monitoring of animals rates.

Government should also tackle the problem of initiation of diseases from the animals to people;

People of Pakistan celebrate this Eid with vigor and intensity. We see big domestic animal markets starting way before Eid, people according to their pockets buy these animals. There are different sections in these animal markets, like he VIP animal section and the normal animal section.

some of these diseases such as "Congo-Virus" can be very brutal and may also result in the loss of life. Many people don't buy animals or even if they have their own sheep, goat, cow or a camel-doesn't go near them due to the fear of getting a disease from them. According to media reports, every year loads of people have to face death these days, after they are infected with diseases from animals.

Therefore, government of Pakistan should take immediate precautions to look up to these important matters, as if these problems are sorted, more people will be able to buy animals and perform the "sacrifice" on Eid day.

Child Grooming

“Groom”, Word that is the aspiration of everyone. It's human psychology that every individual, though of any age wants to change something in him. He thinks that he can modify and advance himself like this.

Grooming in a positive and acceptable mode which could greatly change your life along with over all attitudes and thinking pattern. But before this, we need to understand this confusing term, as the term “Grooming” is misunderstood by many people of modern society.

Groom may simply mean as wearing fashion or living a modern life with high choices and status, by the people. But this kind of concept is totally wrong and unacceptable. Groom is a universal word and different people may take this term in a different sense. Grooming means to get as over-all positive change in your personality, intelligence level, your abilities, your manners and your appearance.

Over-all change in these things could be called as the grooming factor. Grooming of a child or at any phase is the most significant action. Theories according to which child Grooming could be done are of two basic kinds; Western technique and Eastern technique. These two techniques are used commonly. There are a number of factors which makes these two techniques

different in nature and practice.

While considering the grooming of a child, the first and foremost difference is of education and literature. In western Grooming, children are made habitual of reading. Their books, its context and their courses are totally different as compared to eastern modes.

To make a child groom-well, means to make his mind and thinking groom, for that western grooming techniques provides kids with special contexts that is injected into their minds through different method. They make their kids creative but this is not the case in Eastern methods at all. Eastern methods mostly focus on cramming the course over creativity. Lately, eastern countries are also molding towards the grooming techniques of west, as it is most effective in nature and promotes creativity especially in children. Grooming difference comes because of different culture. Neither western nor eastern culture is bad or harmful for grooming but both have their significance.

Parents play a key role in child grooming and we can have a clear difference in parents of eastern society and parents of western society. They give their child their personal arena to present themselves.

Children in Eastern society take guidance from others to groom and are misguided. But in western, they are frank with their parents and share with them all their grooming issues. To groom, consult your parents. They may guide you better than anyone else because they know you more. They give their child their personal arena to present themselves.

How Teenagers See Summer

For them summer is like a bag which is filled with different types of book, some are comics, some are novels, plays, encyclopedias and some are scientific in nature.

By: M. Ahmad

Hot blowing tone of sun and long days with endless burning atmosphere is specialty of summer. Summer means different to different people, for grownups summer is nothing but a punishment by nature, but when it comes to teenagers' summer is a sort of fun time for them. The most important reason for this has to be the summer vacations, when they get holidays from their academic centers, it's the summer holidays!

There is more to story, in teenagers there are also some who like summer and some dislike it as well. Teenagers who like summer see it as an opportunity to do fun things which includes playing outside the house with couple of friends having a crazy time. Calling out friends and playing together is itself a fun for them, they don't need to do any other adventure, when you have you best friends to play with you.

Visiting cousin's place with family, arranging long table lunch and dinners, talking hard during meals, laughing, pushing each other's leg, is a massive level amusement for them. Sometimes, all of sudden everyone makes a plan of going out on which everyone agrees upon without even thinking for a second. Watching a late night movie is a must thing with family in summer, without it night doesn't go well.

On the other hand there are some teenagers who don't like summer for the fact it is "summer". They cannot handle hot bashing sun, neither they can play outside during holidays, they have their own way of tackling summer, which goes through a series of intense study sessions .

They study and keep on doing till until summer is over along with its holidays. Their best friends are their books only, nothing else but the books on whole; they read a book, finish it and immediately start another book. They don't enjoy to go at places but to stay in their library home.

For them summer is like a bag which is filled with different types of book, some are comics, some are

SUMMERTALKIES

novels, plays, encyclopedias and some are scientific in nature. Maybe is the reason that these types of teenagers are brilliant with studies and excellent in knowledge and are up to date. People might think that summer is meant to be easy on teenager, but for nerd teenagers it is as academic as they keep on making it.

No discrimination is to be made in between these different type of teenagers for their different responses to summer and summer holidays, as after all every individual in different and unique in their own dissimilar ways but that does not means some are superior to other or some are inferior as compared to other. However, it can also be assumed that some teenagers are more easy in trying out different things in summer and some are more easy to stay in their own comfort zones in during this season, the things which really matters over here is that, no matter in which way but summer in an imperative episode for teenagers.

There is more to story, in teenagers there are also some who like summer and some dislike it as well. Teenagers who like summer see it as an opportunity to do fun things which includes playing outside the house with couple of friends having a crazy time.

PETS!!!

People of the house including the kids may also get various fatal viruses and disease from the pets as well, which may directly affect their health or cause allergies.

By: Umar Farooq

An adorable dog, or a sweet little cat, a greenish parrot or fishes in the tank, who doesn't like to have a pet. Many people especially the teenagers of today love to have pets, to which they tame, they look after, take out for walk, splash water and make them bath while bathing with them too and do what not for their pets. The concept of having a pet is more common now days as compared to previous times in teenagers.

People in west consider pets as an essential part of their family and treat them just like any other member of the family. They deeply care about them and whenever they notice even a minor change in the behavior or overall health of their pets, without wasting anytime they rush to veterinary doctor (animal doctor) and ensure the well being of their pet. If there is a need of any kind of medicine they take it on their nerves to make sure that the pet is having medicines at the prescribed intervals.

When it comes to best pets for home dogs, cats and parrots are the most favorite ones. They are loved by everyone. Pets are not just for the sake of showcasing only, but there are many facts related to advantages and disadvantages of having pets. They are very beneficial for being a perfect and constant companion for the owner and having a pet doesn't make a person to be alone anytime, moreover pets such as dogs are considered of great importance as they not only provides a companionship for its owner but also protects and safeguard the house and its master.

There are a number of cases where thieves tried to break into the house and dog alarmed the owner of some gate crash entries by barking continuously, saving the house and the owner both at same time. In documentaries it is seen many a times that before a big storm or earthquakes pets behave differently to alarm the owner of possible danger. Hence they have a very sharp sense of observation which is far beyond human senses.

At the same time pets also prove to be a wrong buddy at various situations such as if there is a newborn in house, the pet such as dog or a cat may hurt the little one in any which way, this is very dangerous condition as babies have a weak and under developing bone structure and utterly soft skin making them too dangerous to be nearby any kind of pet. People of the house including the kids may also get various fatal viruses and disease from the pets as well, which may directly affect their health or cause allergies.

People on the other hand are different in response to pets, some people really like to have a pet and love spending time with them while there are also some people who do not like to have pets, but usually these kind of people are very few in number because when a cute puppy or a lovely kitten comes in front of a person, everyone like it and want to have either one of them.

People in west consider pets as an essential part of their family and treat them just like any other member of the family.

2 phones

KEVIN GATES

LYRICS

Hello? What the deal? Bet
 I got two phones, one for the plug and one for the load
 I got two phones, one for the bitches and one for the dough
 Think I need two more, line bumpin' I'm ring, ring, ringin'
 Countin' money while they ring, ring, ringin'
 Trap jumpin' I'm ring, ring, ringin' (2)
 Button start the foreign, oh my God I'm gorgeous
 I just put the key inside my pocket park
 It might not get to see, this a new Ferrari
 Man in the mirror, how you choose to bother
 Someone said they callin', I don't feel like talkin'
 Everything is different, turned the way I bought it
 Phone be interrupting me while I'm recordin'
 Phone be making women feel they unimportant
 Call my dog, he say it's all the way retarded
 Keep the ore 'cause I am not using the Foreman
 Kitchen, I just finished up a new performance
 Hater, wish you well
 I got clientele
 I just got it off the scale
 I got two phones, one for the plug and one for the load
 I got two phones, one for the bitches and one for the dough
 Think I need two more, line bumpin' I'm ring, ring, ringin'
 Countin' money while they ring, ring, ringin'
 Trap jumpin' I'm ring, ring, ringin' (2)
 There they go again, one of my lil friends
 They don't give a damn how a nigga been

All they wanna know is what I got to give
 How much did I spend? What I got to lend?
 What I did and what I didn't do for them
 Bricks comin' in somewhere on the rim
 Section doin' numbers, nowhere by a gym
 Rappin' bottles spin, I'm supplin' 10
 Jumpin' out a Honda, I just got it in
 Askin' what I cop, none of your concern
 One day you gone learn what you tryna get
 Everything on sale, goin' out of biz
 Partners up in jail, gotta feed the kids
 Juggin' 'round the city, you know what it is
 Bread winner business, put that on the wrist
 I got two phones, one for the plug and one for the load
 I got two phones, one for the bitches and one for the dough
 Think I need two more, line bumpin' I'm ring, ring, ringin'
 Countin' money while they ring, ring, ringin'
 Trap jumpin' I'm ring, ring, ringin' (2)
 Ring, ring, ringin' man
 Find me balling hard
 Come from grinding hard
 Getting calling cards from your Barbie doll
 When she 'round me she know I'm her bodyguard
 Money callin' for me, baby girl I'm sorry
 You just side yelling you not that important
 Waist shaper I could pin you to the carpet
 Smell like tarter, I'mma put you in the water
 Conversation cost a lot of chips
 She don't really get a lot of this
 Engagin' where I'm gazin' at her hips
 And ain't nobody makin' no attempts
 Amazing clip, hanging, slanging dick
 Maybe we can make it takin' trips
 Maybe I was thinkin' too impatient
 Phone ringing, hold up, what it is?
 I got two phones, one for the plug and one for the load
 I got two phones, one for the bitches and one for the dough
 Think I need two more, line bumpin' I'm ring, ring, ringin'
 Countin' money while they ring, ring, ringin'
 Trap jumpin' I'm ring, ring, ringin' (2)

PASSION FRUIT DRAKE

LYRICS

Listen..... Seein' you got ritualistic
Plans in my soul of addiction for now
'Cause I'm fallin' apart, yeah
Tension

Between us just like picket fences
You got issues that I won't mention for now
'Cause we're fallin' apart
Passionate from miles away
Passive with the things you say
Passin' up on my old ways
I can't blame you no, no
Passionate from miles away
Passive with the things you say
Passin' up on my old ways
I can't blame you no, no

Listen

Hard at buildin' trust from a distance
I think we should rule out commitment for now
'Cause we're fallin' apart
Leavin'

You're just doin' that to get even
Don't pick up the pieces, just leave it for now
They keep fallin' apart
Passionate from miles away
Passive with the things you say
Passin' up on my old ways
I can't blame you no, no
Passionate from miles away
Passive with the things you say
Passin' up on my old ways
I can't blame you no, no

[Girl on phone:]

Trying to think of the right thing to say

VIRGO (August 22 – September 22) The Virgo Star Sign Personality

Virgo's are one of the most misunderstood signs of the zodiac. People think they're fussy, critical, bad tempered and picky but that's only because they want everything to be perfect. This is the sign of cleanliness, although lots of Virgo's have the messy bedrooms and hang their clothes on the floor. They're extremely inquisitive and have a dreadful time trying to relax. Virgo's also makes fantastic friends. If a minor crisis pops up you can be sure the Virgo will have everything under control in 30 seconds. They are always on the move because they like to learn as much as they can before they take off again. They excel at work so they probably get all the boring jobs (the ones Leo wouldn't be seen dead doing).

Inside Virgo

Virgo's are highly intelligent, interested in everything and everyone and happy to be busy with many jobs and hobbies. Many have some kind of specialized knowledge and most are good with their hands. Their nit-picking ways can infuriate their colleagues. They find it hard to discuss their innermost feelings and this can make them hard to understand. In many ways, they are happier doing something practical than dealing with relationships. These people can overdo the self-sacrificial bit and make themselves martyrs to other people's impractical lifestyles. They are willing to fit in with whatever is going on and they can adjust to most things, but they mustn't neglect their own needs. Although excellent communicators and wonderfully witty conversationalists, Virgo's prefer to express their deepest feelings by actions rather than words. Most avoid touching all but very close friends and family members and they find lovey-dovey behavior embarrassing. These people can be very highly sexed and they may use this as a way of expressing love. Virgo's are criticized a good deal as children and are often made to feel unwelcome in their childhood homes. They in turn become very critical of others and they can use this in order to wound.

Many Virgo's overcome inhibitions by taking up acting, music, cookery or sports. Acting is particularly common to this sign because it allows them to put aside their fears and take on the mantle of someone quite different. They are shy and slow to make friends but when they do accept someone, they are the loyalist, gentlest and kindest of companions. They are great company and have a wonderful sense of humor.

Virgo at Work

If you need something done right, you'll do it yourself. In fact you pay attention to all the details and it's usually those small differences that really set you apart from your competitors. What helps is that you are the practical type and enjoy learning about and doing all the work yourself. Even though you can be slow to catch on to new technologies, once you embrace them, you soon know them inside out. If things start to go bad, you are excellent at getting in there and fixing the situation. You do however, need to relax from time to time doing the everyday type of work, otherwise you will soon become too stressed and panicked and not much use at all!!

Forecasting Future

Virgo, yours is the star sign of true perfectionism, diligence and first-class service. You are extremely conscious of how well everything should be done. But you're also critical about most things, especially your own character and this is what people sometimes misunderstand about you and think that you're impossible to please. This is just the way you are wired and your attention to detail and aspiration to excellence carries over into every aspect of your life, including the way you see yourself.

Everything has to be just right with you, Virgo, so you do have this unusual tendency to be particularly fastidious about your environment and the way you look. You have very high standards and, unless others are able to meet these requirements of yours, they may find it extremely hard getting into your good books.

Cleanliness and hygiene is also one of your bugbears. There's nothing wrong with keeping clean and making sure your health is up to scratch, but for some Virgos, this can become an obsessive pastime and does seem rather odd to those who aren't quite as meticulous as you are.

You're an excellent critic and observer of human nature and the world around you. Your analysis of life and what goes on in it is usually quite correct, but try to curb your habit of finding fault with every little thing. This will be very annoying to your loved ones, who will find it hard meeting your expectations. Again, this tendency will be turned on yourself with the result that you may never be quite satisfied with your own work or who you are as a person. There's nothing wrong with you Virgo; you're one of the good guys, remember that.

LOVE THE EDUCATORS

Where little ones learn big!

At The Educators Pre-school, we believe in the philosophy of 'Learn. Share. Laugh. Grow'. Our curriculum is especially designed to support early development of creative and curious young minds, making learning a fun experience.

Learning big through..

- Thematic based learning
- ICT integration in teaching
- Contemporary early learning methodologies of qualified and experienced staff
- Audio-visual and multimedia teaching aids
- Educational and informative trips
- Social grooming and manners
- Artwork and creative learning
- Child centered teaching strategies
- Language and numeric skills
- Problem solving/analytical skills
- Interactive social capabilities
- Physical development activities
- Parental involvement

USAID
FROM THE AMERICAN PEOPLE

Together we will create a

ROSHIAN PAKISTAN

Brighter Pakistan is a goal towards which the American and Pakistani people have been working hand in hand for more than six decades. This cooperation has achieved many milestones, and there is much more to be accomplished.

We firmly believe that by spreading education, increasing production of electrical power and alleviating poverty we will create a brighter Pakistan.

Energy

Construction of new dams, renovation and modernization of equipment in existing facilities and expansion of power plants.

Education For Everyone

Construction of schools and colleges, expansion of universities, provision of school supplies, scholarships for higher education, funding for research programs and supporting advanced training for teachers.

Poverty Alleviation

Providing tools and skills for people in disadvantaged regions so that they can earn a better living.
